

## SE49K series

*Friction thermocouple for brake disk*

Ref: 2236

Rev:

### DESCRIPTION

This friction thermocouple is the perfect product for brake disk with bronze shoe measurements. It is robust, easy-to-use and unexpensive and brings very satisfying response time.

*MESUREX is a sensor manufacturer, we can adapt almost most sensors to your needs. Please [contact us](#).*

### TECHNICAL CHARACTERISTICS

Pyrocoax in 0.5 mm, adjustment screws for hardness of the application, fixing by screw diameter 5 mm, temperature measurement by sleeve of length 500 mm and a miniature Type-K connector, according to IEC 584-3 norm. Grounding option with connector, calibration, hardening.

- Dimensions : 85 mm x 12 mm x 20 mm
- SE49: Surface friction model
- Type: K thermocouple
- Tolerance class: 1 Class, according to NFC 42321 and IEC 584-3 norms
- Temperature resistance: -40 to 900 °C at peak
