

## TRHUGPRS series

### Wall Display - Recorder temperature and humidity GPRS

Ref : FP 4008

Rev :

## DESCRIPTION

GPRS temperature logger is a connected device that allows the collection of temperature and humidity data. It enables wireless data transmission through GPRS, GPS positioning and real-time remote monitoring of temperature and humidity. It also has an alarm that transmits a text message when the data value exceeds the limits.

## TECHNICAL CHARACTERISTICS

Model	Model 1 ET	Model 2 EX	Model 3 DT
Temperature accuracy	±0.5°C		
Humidity accuracy	±0.5°C	/	
Temperature measuring range	-40~85°C		
Humidity measuring range	0~100%RH	/	
Sensor type	External thermocouple		
Recording capacity	10000		
Interface	USB		
Recording rate	10s~240s		
Dimensions	90mm x 55mm x 18mm		

Delivered with :

## ToMonitor software

Remote real-time integration network solution, real-time data can be downloaded and viewed on ToMonitor software, and historical data can be searched by ToClient software.
