

## TRHUA200H series

### *Hygrometer thermometer with alarm*

Ref: 4003

Rev:

### DESCRIPTION

The hygrometer thermometer with alarm of the TRHUA200H series measures temperature and humidity with different levels of high accuracy and has an alarm. A large LCD display shows information such as real-time temperature and humidity, maximum or minimum value recorded, time, battery status, etc. This meter is already in place in many laboratories, factories, and medical warehouses.

The temperature and humidity limit can be set on the devices and as soon as the limit is exceeded an alarm is triggered. The recorder could calibrate the deviation, help maintain high accuracy of the recorder. The product also exists with an external sensor.

### TECHNICAL CHARACTERISTICS

Temperature accuracy	±0.5°C
Humidity accuracy	±5%RH
Temperature measurement range	With internal sensor: -20~+70°C external sensor*: -40~+85°C
Humidity measurement range	0 ~ 100%RH
Resolution	0.1°C /0.1%RH
Alarm	Audible & light warning
Precision	±1°C± 5‰ FS
Certificate	CE, ISO
Dimensions	135mm x 124mm x 35mm
Weight	330g
Supply	1 battery 9V
